Keyboard

Internal

PulsON LCD / C is a keypad with rubber buttons, designed for everyday use of the PulsON Alarm system. The graphic LCD display presents clear information about the current state of the system, and the LEDs above it reflect the state of the zone / system.

In addition, the keypad is equipped with 6 function buttons for quick recall of a function specified by the installer and 3 buttons for special alarms such as fire, panic, and medical alarm. Thanks to the backlight of the buttons, the PulsON LCD / C keypad will also be perfect for unlit rooms. Each keypad is equipped with 2 additional zones of detection lines, which enable the connection of further detectors.

The keypad has been designed in accordance with the requirements of the EN-50131 standard in the scope of Grade2.

Main advantages:

- Graphic LCD display
- Rubber buttons on the keyboard
- Fire, panic, medical alarms triggered from keypads with dedicated buttons
- 6 programmable function buttons
- LEDs showing the status of the partition
- Backlight buttons on the keyboard for easy service in unlit rooms
- Acoustic signaling of selected events in the system
- Tamper protection
- 2 zones of detection lines
- Addressing the keypad with switches DIP-Switch type
- Simple assembly thanks to the removable one cable terminal

LCD/C manipulator

Technical Specifications

Manipulator	LCD/C
Manipulator type	With rubber buttons
Type of display	LCD
Number of inputs	2
Color	Black/White
Power supply of the module (from the bus)	12V DC (+/- 15%)
Power consumption	35 mA (max.)
Working temperature range	-10°C do +55°C
Humidity	Up to 93% without condensation
Dimensions	96 × 157 × 18 mm
Weight	165 g
